 Title: **JP2301014A2: MANUFACTURE OF FLOATING TYPE MAGNETIC HEAD**

 Country: **JP** Japan

 Kind: **A**

 Inventor: **MATSUBARA TAKAO;**

 Assignee: **NEC CORP**
[News, Profiles, Stocks and More about this company](#)

 Published / Filed: **1990-12-13 / 1989-05-15**

 Application Number: **JP1989000122426**

 IPC Code: **G11B 5/60; B24B 21/00;**

 Priority Number: **1989-05-15 JP1989000122426**

Abstract: PURPOSE: To manufacture a large number of floating type magnetic heads having fine edge beveling with high yield by working the head by using a jig consisting of a soft grind medium and a medium guide with the shape corresponding to that of the magnetic head, etc.

CONSTITUTION: A grind tape 10 is set from a grind tape delivery reel 8 to a take-up reel 9 via a tension sensor 11 and a grind tape guide 12 whose shape is fitted in that of the rail 6 of the magnetic head in advance. Next, linked thin film magnetic heads 14 are descended until prescribed tension is produced. At this time, the edge of the rail 6 comes in contact with the tape 10 having a gentle curve between the guides 12. Therefore, the beveling of the edge can be performed by reciprocating the reels 8 and 9 in forward and backward directions for constant time. The depth and the width of the beveling can be controlled with the tension and the reciprocating time of the tape 10.
